The US-Canada trade war

This story receives extensive, varied treatment across all outlets. The Daily Telegraph runs two opinion pieces - one warning Canada's economy will ultimately suffer most, another likening the trade rupture to a costly overreach the White House will regret amid American war-weariness. Die Welt reconstructs in detail how the near-finished deal collapsed at the last minute amid internal Trump administration power struggles, while Süddeutsche Zeitung focuses on the mutual damage to two deeply intertwined economies, calling the breakdown a needless political gamble ahead of midterms. The Guardian is most sympathetic to Canada: two opinion pieces praise Carney's refusal to be bullied, a news piece frames the talks' collapse as a warning to the world, and another highlights the fight over Quebec's French-language protections as the specific flashpoint.

Western aid to Ukraine and the air-defence gap

The Daily Telegraph, Süddeutsche Zeitung, and Die Welt all cover fresh Western aid pledges to Ukraine, but The Daily Telegraph is most pointed in arguing that Andy Burnham's Storm Shadow gift, however symbolically bold, misses Kyiv's real need - Patriot interceptors only America can supply - while a companion piece praises Britain's resolve. Süddeutsche Zeitung frames continued aid supportively while also calling for tougher sanctions, and Die Welt likewise flags the persistent Patriot shortfall while stressing that Putin shows no genuine interest in ending the war. All three broadly endorse continued support, differing mainly in emphasis between hardware gaps, sanctions, and Russian intent.

Genocide or self-defence: the framing of Gaza

Gaza coverage splits sharply along source lines: The Daily Telegraph runs an opinion piece explicitly rejecting genocide accusations against Israel, citing Gaza's population growth and Israel's stated aim of defeating Hamas rather than annihilating a people. The Guardian, by contrast, covers a Venice-premiering documentary alleging a calculated system of mass killing of civilians, and separately reports on forensic audio work suggesting Israeli forces directly targeted aid workers - both Guardian pieces converge on an accusatory framing. Süddeutsche Zeitung takes yet another angle, arguing that Netanyahu's long tenure has brutalized Israeli society and made peace politically taboo.

Crisis in FIFA leadership

The Guardian and Süddeutsche Zeitung both cover mounting pressure on Gianni Infantino but from different angles: The Guardian emphasizes players' demands for structural change and greater player/fan voice, while Süddeutsche Zeitung analyzes the organizational coalition (UEFA, AFC, Concacaf) pushing for a rotating presidency model, framing Ceferin's decision not to run as paradoxically strengthening his position as opposition leader.

Migration & Society 2 sources · 1 language

Channel and European migration crisis

The Daily Telegraph runs an undercover investigation framing Channel crossings as a national security emergency ignored by weak leadership, and separately reports on an Italy-Germany row over rescue-boat migrant dumping and EU asylum-pact quotas. The Guardian instead cites an NGO report arguing that UK-funded French

enforcement has made crossings more violent and dangerous without curbing them - a critique of the enforcement approach itself, the opposite framing from the Telegraph's security-emergency angle.

Technology & Media

2 sources · 1 language

Cyber and tech mobilized for national security

Die Welt reports on Germany's intelligence agency recruiting gamers to build cyber-retaliation capacity against Russia, framed as historic reform of a once-restrained service. The Guardian covers a broadly similar theme - a UK-Ukraine deal using AI trained on battlefield data to protect British infrastructure - but adds a critical civil-liberties angle about the technology potentially being used against protesters.

US economic pressure on Iran and China

The Daily Telegraph reports the US Treasury's aggressive new sanctions campaign against Iran largely as straight news framing it within Trump's broader strategy. The Guardian covers the same sanctions push more skeptically, quoting experts who

doubt the 'economic strangulation' approach will succeed and stressing its toll on the global economy.

The rise of the AfD in Germany

Die Welt and Süddeutsche Zeitung both extensively cover the AfD's rise but from different vantage points. Die Welt runs a cluster of pieces: one arguing the surge stems from genuine migration and deportation policy failures rather than mere sentiment; another defending Sachsen-Anhalt voters as rationally responding to establishment failure rather than acting foolishly; and two pieces reviewing Justus Bender's speculative novel about a future AfD government, warning - somewhat wryly - about the erosion of the political 'firewall.' Süddeutsche Zeitung takes a more critical tack throughout: one piece attacks AfD leader Chrupalla for climate-change denial, another profiles an activist trying to reclaim national symbols co-opted by the AfD, a social psychologist warns of the normalization of right-wing extremism, and a methodological piece cautions against misleading historical analogies comparing the AfD's rise to past political shifts.

Climate costs and Germany's energy transition

Süddeutsche Zeitung runs a cluster of pieces on German energy policy: one argues the economic costs of climate neglect are now becoming visible and will hurt those clinging to fossil fuels; another criticizes the economy minister's plan to build new water-intensive nuclear plants despite worsening water scarcity, advocating wind and solar instead; a third criticizes companies and politicians for failing to prepare for water shortages despite years of warnings; a fourth criticizes shifting freight from river to road as climate-damaging and attacks conservative politicians for opposing wind power; and a fifth takes the opposite view, calling for a 50% wind/solar and 50% nuclear mix and criticizing Germany's nuclear phase-out as a mistake.

Additional Coverage 1 source · 1 language

Russia-Ukraine war

Additional coverage (not merged into a cross-source comparison): The author argues that Ukraine's growing ability to produce its own advanced weapons, aided by UK and European support, is reducing its dependence on Western allies and improving its military position, and that the West must hold firm and continue backing Kyiv rather than let Putin exploit division and delay. Key excerpt: "War is a terrible thing, but what is the alternative? Moscow offers little evidence that territorial success would satisfy it."
