The Daily Telegraph runs two connected pieces: a news report detailing the cyberattack that shut down a UK power plant and linking it to a broader Iranian escalation since US-Israeli strikes began, and an opinion piece that uses the same incident to demand a tougher, less complacent British stance toward Tehran.

Global Bond Market Crisis and Central Bank Policy

The Daily Telegraph runs three related pieces on the bond crisis: one warns that Trump and Bessent are waging an unwinnable war against bond vigilantes amid ballooning debt in the US, UK, France and Japan; another focuses on Bessent's bond-buying tactics as a risky 'financial repression' gamble reminiscent of banana republics; and a third criticizes the Bank of England's quantitative tightening as needlessly costly to taxpayers. Together they paint a consistent picture of alarm over fiscally reckless Western governance.

And Sino-Ukraine relations / broader

Additional coverage (not merged into a cross-source comparison): The West's post-Cold War complacency and social-democinclination weakened defense of free-market capitalism, allowing the Left to claim moral high ground and enabling extremism on both sides; only reviving liberal democracy with genuine free-market capitalism can restore stability. Key excerpt: "The combination of liberal democracy and free-market economics creates the best possible conditions for human beings to flourish."
